PROFILE

Full-Stack student at Mate Academy and Software Engineering major at KPI with a focus on building web solutions. I have a grasp of React fundamentals, Node.js, and SQL/NoSQL database management.

My background as a UI/UX Designer allows me to bridge the gap between complex backend logic and intuitive frontend interfaces, ensuring a seamless user experience. Beyond web development, I have a strong interest in AI/ML, with hands-on academic experience in implementing k-NN, Random Forest, and data visualization. Currently, I am deepening my expertise in NLP and LLM integration to build more intelligent applications.

Passionate about clean code, user-centered design, and continuous learning in a fast-paced environment.

EDUCATION

Mate Academy | 2025 – Present

- Gaining hands-on experience in web development with React and Node.js
- Learning backend logic, database management, and building responsive web applications

National Technical University of Ukraine
«Igor Sikorsky Kyiv Polytechnic Institute» | 2023 – Present

- Strong foundation in software engineering principles, algorithms, and data structures
- Academic projects in machine learning, data analysis, and web development

SKILLS

- Frontend: React (fundamentals), HTML5, CSS3 (SCSS), JavaScript, TypeScript
- Backend: Node.js, Django
- Databases: PostgreSQL, MongoDB, MySQL
- Other / ML: NumPy, Pandas, Matplotlib, Scikit-learn

LANGUAGES

- Ukrainian – Native speaker
- English – Upper-Intermediate

CERTIFICATES

English | 2025
EF SET

Figma Course: Web & Mobile Projects from Scratch | 2025
Udemy
